## Pollinator Trivia

Email [growportland@gmail.com](mailto:growportland@gmail.com) to request the answers. Write "Pollinator Trivia" in the subject line. Google away!

1. What is the only mammal pollinator?
2. What is the only non-living pollinator?
3. Two varieties of this pollinator are frequently found in Portland, they are called the Anna's and the Rufous. What kind of Pollinator are they?
4. If a flower is green or white and hangs down near the ground, it may be pollinated by what pollinator? Why do these pollinators prefer low-hanging flowers?
5. Name three kinds of bees other than honey bees:
6. Moth or butterfly: which one has feathery or saw-edged antenna?
7. Moth or butterfly: Which one folds its wings above its body when at rest?
8. Many flowers can be visited by multiple kinds of pollinators, but corn is only pollinated by one on the list. Which is it?
9. *Darlingtonia californica*, otherwise known as the cobra lily, is a rare carnivorous plant native to Oregon. Scientists currently do not know which pollinator visits this strange flower, but they have a hypothesis. Which pollinator do they suspect visits the rare flower?
10. Which pollinator lives in hives that can include up to 80,000 individuals?
11. The Oregon Silverspot is an endangered species of which pollinator?
